

Earthquake Experience Room

Preparation Before, During and After Earthquake with Mixed Reality (MR) in 3D Environment!

The Earthquake Experience Room is designed to raise awareness about the danger of an earthquake before experiencing the real one. You will learn to prepare an emergency bag, **the collapse-trap-hold procedure** during an earthquake and what the correct behavior should be in case of being trapped under rubble after the earthquake. Our goal is to increase the level of awareness of the precautions to be taken against earthquakes and the preparations to be made with the experience it provides to the end-users.

BENEFITS OF MR IN EARTHQUAKE TRAININGS

- ✓ **Pre-Preparation:** Experience a virtual earthquake and familiarize yourself with the necessary emergency procedures in advance
- ✓ **Increased Awareness:** Increases users' earthquake awareness about what to do before, during and after an earthquake
- ✓ **Improved Communication Skills:** Teaches you how to communicate with the outside world during an earthquake
- ✓ **Stress & Panic Control:** Reduces your risk of panicking by helping you to be prepared for stress during a possible earthquake
- ✓ **Less Casualties:** Prepares you and users in advance and reduces the number of earthquake casualties

WHY EARTHQUAKE EXPERIENCE ROOM?

- ✓ First of its kind with mixed reality (MR) technology
- ✓ Realistic experience with extended and mixed reality
- ✓ Compatible with XR headsets
- ✓ An easily portable and installable system
- ✓ Opportunity for continuous improvement
- ✓ Training in a safe and controlled environment
