

Earthquake Awareness Training

Available in 2 Modes: Adult & Children Preparation Before, During and After an Earthquake with Mixed Reality (MR) and Virtual Reality (VR) in 3D Environment!

Earthquake Awareness Training now offers two distinct modes designed for different age groups and institutions. The **Adult Mixed Reality (MR) Mode** provides a hyper-realistic earthquake simulation where users can practice emergency actions, communicate under stress and develop correct behavioral reflexes in a safe environment. The **Children's Virtual Reality (VR) Classroom Mode** delivers guided and age-appropriate scenarios that teach young learners how to prepare an emergency kit and practice Drop-Cover-Hold On in virtual environment.

Benefits of XR in Earthquake Training?

- ✓ **Pre-Preparation:** Experience a virtual earthquake and familiarize yourself with the necessary emergency procedures in advance
- ✓ **Increased Awareness:** Increases users' earthquake awareness about what to do before, during and after an earthquake
- ✓ **Improved Communication Skills:** Teaches you how to communicate with the outside world during an earthquake
- ✓ **Stress & Panic Control:** Reduces your risk of panicking by helping you to be prepared for stress during a possible earthquake
- ✓ **Less Casualties:** Prepares you and users in advance and reduces the number of earthquake casualties

WHY EARTHQUAKE AWARENESS TRAINING?

- ✓ Realistic experience with virtual and mixed reality
- ✓ Compatible with XR headsets
- ✓ Easy usage
- ✓ Opportunity for continuous improvement
- ✓ Training in a safe and controlled environment
